

FIX Flyer Order Management & Routing for InvestEdge Clients

FIX Flyer's order management and routing solutions are now available through the InvestEdge portfolio management system.

Through this integration, financial advisors can seamlessly access FIX Flyer's broker-neutral platform and execute trades across various asset classes all within InvestEdge's intuitive, secure system.

FIX Flyer through InvestEdge empowers financial advisory firms to:

1 Streamline trade execution

- Manage orders and trading decisions across multiple brokers and custodians
- Monitor order flow and statuses

2 Optimize workflows

- Integrated trading and post-trading activities for equities and mutual funds – FIX Flyer supports options, futures and fixed income
- Simplify order blocking, allocation management, partial order fills and Trade Away practices

3 Control costs

- Connect to all of the major custodians and brokers on a unified, centralized network that enables flexibility and price control
- Introduce new efficiencies by eliminating the gap between order decision and execution

4 Reduce operational risks

- Centralize order-trade-allocation workflow across accounts, executing brokers, clearing firms and custodian banks

Increased control, efficiency and compliance creates better outcomes and a superior investing experience for firms, advisors and clients.

Improve the investment experience with InvestEdge and FIX Flyer.
